

March 14, 2011

Dear SpanSion Customers and Partners,

We are deeply saddened for our Japan customers, partners and neighbors who have experienced hardship and impact from the Earthquake and Tsunami. SpanSion is committed to helping you, our partners, employees and neighbors in Japan. We are thankful that all SpanSion employees are safe. SpanSion will be donating \$250,000 to the Red Cross relief efforts and will continue to monitor the situation and help our community as best as we can.

We understand many of you have questions about any supply impact. Because our final manufacturing sites are outside Japan, the impact to near term supply is minimal. We have no reports of any major damage to the fabrication facilities of our partners in Aizu-Wakamatsu, Japan and the facilities are being brought back online. We are actively engaged with TI and Fujitsu and will continue to share any new information we receive.

Please contact me directly or your local sales representative if you have specific questions and need immediate assistance.

Best regards,

John H. Kispert
President and Chief Executive Officer
SpanSion Inc.
